Campaign Introduction

Top 100 "Most Competitive"

Auto Parts Suppliers Award 2010

Top 100 "Most Competitive" Auto Parts Suppliers Award 2010 is organized by Gasgoo International and co-organized by VDA, aiming at revealing and supporting the fast growth companies in Chinese auto parts market in the past ten years.

China auto production and sales in 2009 will probably surpass the U.S. as the world's largest market, which leads to rapid development of auto parts market in China. The next 5 years, China auto market is likely to reach a 20 million production scale and will truly become the world's largest auto production and sales state, i.e. not only foreign-funded enterprises and joint ventures, but local large/middle/small scale suppliers are faced with unprecedented development opportunity.

Simultaneously, China is still an emerging market for auto industry. It is still too early to say who are final winners among OEMs and auto parts suppliers, especially for the latter. Those who held leading position in history or are current leaders do not mean they can always keep advantage in the future. There is a fierce marathon competition among local and global companies in auto industry. So who will come to the fore in China auto market, the early starters or latecomers? Let us show you the result.

Selection Process

Top 100 “Most Competitive”

Auto Parts Suppliers Award 2010

2009.12-2010.4 Declaration

Self Nomination:

Direct declaration on Gasgoo International (<http://www.gasgoo.com/>)

Recommendation:

We will contact those who are recommended by Judging Panel and collect their application form.

We will contact those who are recommended by local associations to collect their application form.

2010.4-2010.6 Primary Selection

900 suppliers will be picked out through evaluating all the submitted materials by judging panel. It will be published on Gasgoo, OE SNS and magazine “Chinese OE Suppliers”.
